BIOPHARMANET-TEC CODE OF ETHICS

The Interdepartmental Centre of Research for Innovation of Health Products – BIOPHARMANET-TEC aims to promote, manage and take part in:

- Industrial research projects;
- Advanced training services, also oriented to technology transfer.

The technological areas involved are:

- Industrial research and technology transfer related to Life Science Platform, with particular attention to topics concerning:
- Pharmaceutical Technology, Drug Delivery;
- Medicinal Chemistry, Drug Discovery;
- Drug Development;
- Experimental Pharmacology and Toxicology;
- Pharmaceutical Engineering and Process Technologies;
- Biochemistry and Molecular Biology, Recombinant DNA Technologies.

In all these activities, the Centre BIOPHARMANET-TEC is committed to observe the compoment requirements listed below:

- to spend a significant part of its human and technological resources for activities devoted to improve directly or indirectly the entrepreneurial system of the Region;
- to use human resources, with levels of technical expertise and experience, suitable to guarantee the quality of the performance in all the activities carried-out, promoted and/or managed;
- to employ all the technical and functional tools that are required to reach the expected results, if necessary, even by using outsourcing of services and personnel or by enrolling new staff;
- to comply with the deadlines established by the industrial research and training projects or with timetable agreed with clients for all those activities characterized by a custom adaptation of services;
- to provide services to the market, in agreement with the level of quality and expertise that are required to all the members belonging to the REGIONAL NETWORK;
- to implement all required procedures to ensure and maintain an high level of quality perceived by clients and partners, in terms of knowledge, expertise, and service quality standards;
- to disclose to the public knowledge, through its Web site, the survey results on the level of quality perceived by clients and partners;
- to enrich its scientific level and expertise in order to provide to clients and partners constantly updated services and resources;
- to collaborate with the other structures of the REGIONAL NETWORK and, if the structure is unable to directly answer to client needs, to direct the client to other expert subjects, particularly within the REGIONAL NETWORK;
- to not operate exclusively for a single client;
- to report any possible conflict of interest;
- to avoid tot carry out expertise and evaluation on companies with which it cooperates in research projects and consultancy.
